JARED N. KHAN

PRODUCT & TECHNOLOGY LEADER

AI & Automation from Pilot to Production · Regulated Financial Services · Risk, Compliance & Audit to Release · Platform Modernization

Rancho Santa Fe, CA · Open to remote · Hybrid San Diego / south Orange County

(626) 922-0870 · jaredkhanpm@gmail.com · linkedin.com/in/jared-khan-pm · github.com/JaredK-PM · jaredkhan.net

PROFESSIONAL SUMMARY

Product and technology leader who owns getting AI and automation from pilot to production at banks and lenders. Sets the roadmap and makes the build-vs-buy, vendor, and risk calls with executives, then stays close enough to the work to write the specification and test the release. At JPMorgan Chase, conceived an automated appraisal decisioning service, wrote its specifications, and carried its production controls through risk, compliance, legal, and audit: 10% better accuracy, 30% less manual review, and $2M+ in annual savings. At Kind Lending, co-led a 20-agent mortgage-operations AI program with the CTO, owning the QA and business sign-off that put 7 agents into production, and redesigned request intake around an LLM-assisted workflow that cut requirements turnaround from weeks to hours. Led at scale: SVP of Product & Platform over $1B+ in monthly origination volume, and VP at JPMorgan Chase owning the Collateral vertical, growing the global team from 40 to 65+ and coaching the product owners who ran it.

SKILLS

AI & automation in production: Intelligent Automation · Automated Decisioning · Rules Engines (Sapiens) · AI Agents · Agent Orchestration · LLM-Assisted Workflows · LLM Workflow Design · AI Agent QA & UAT · Human-in-the-Loop Design · Prompt & Context Engineering

AI build stack: Claude Code · Codex · VS Code · Cursor · ChatGPT · Git/GitHub · Supabase · Vercel · TypeScript

Risk, controls & regulatory: Risk, Compliance, Legal & Audit Sign-Off · Production Controls · Regulatory Action Plans · Fair Lending & Disparate-Impact Review · Regulatory Compliance (Reg B/ECOA, TRID, FCRA, GLBA) · Enterprise Risk Management · Credit Decisioning

Leadership & operating model: Product & Technology Leadership · Product Strategy · Executive Steering Committees · Executive Decision Support · Portfolio Governance · Intake & Prioritization Frameworks · Team Leadership & Coaching (U.S., India, Philippines) · Third-Party Vendor Management · Build-vs-Buy Analysis · Change Management & Adoption · Post-Merger Integration

Product & program delivery: Product Management · Technical Program Management · Product Requirements (PRDs) · Epics & User Stories · Backlog Prioritization · Agile Delivery · Definition of Ready/Done · User Acceptance Testing (UAT) · Release Management · Blue/Green Release Gates · Delivery Governance

Systems & data: API & ETL Specifications · Systems & Platform Integration · Vendor Platform Integration (Encompass, Cotality CMS, Empower, Blue Sage) · Data Mapping & Conversion (MISMO) · EDI · Salesforce CRM Integration · Cloud-Hosted Platforms (AWS, Azure, GCP)

Domain & tools: Mortgage Lending · Loan Origination Systems · Banking · Wholesale Treasury · Jira · Jira Align · Confluence · ServiceNow · Tableau · Power BI · Weighted Scoring Models · Six Sigma DMAIC (Black Belt)

EXPERIENCE

Kind Lending — SVP, Product & Platform | 2025–2026

Owned product and technology strategy and delivery for cloud-deployed wholesale and retail origination platforms processing $1B+ in monthly volume; tripled the distributed technology team.

- Co-led a 20-agent mortgage-operations AI program with the CTO from product definition through handoff to engineering, and owned the agent QA and business-owner UAT sign-off that put 7 agents into production, with 2 more in UAT.
- Redesigned request intake around AI: prototyped the requestor-facing front end in Cursor and put it into production with two back-end developers building from specs. The LLM-assisted workflow converts unstructured business requests into Jira epics and stories meeting Definition of Ready, cutting requirements turnaround from weeks to hours.
- Ran the Executive Steering Committee, bringing roadmap, resourcing, and decision requests to the C-suite, and held weekly working sessions with the founder of LOS vendor Blue Sage.
- Set the delivery operating model: consolidated PMO, email, help-desk, and informal requests into one governed funnel with a codified taxonomy and prioritization cadence, cutting release churn by 25%+, and unified siloed development pipelines into one stable architecture.
- Owned QA and release: raised release-timeline adherence to 100%, delivered role-specific release notes 3 days before launch instead of after, and ran user demos, training rollouts, and post-release warranty support.

JPMorgan Chase & Co. — Vice President, Product | 2018–2025

Owned all collateral technology for the retail first-mortgage channel: origination platform (MX, later Encompass), appraisal AUS operations, title, condo approvals, and appraisal-provider quality tracking. Led 15 direct and 50+ dotted-line reports across the U.S., India, and the Philippines.

- Led technology strategy across five loan-ecosystem domains, each with its own backlog, vendors, and regulatory controls; recommended the vendor-agnostic architecture direction that executives approved and the platform's transition to Encompass realized.

- Conceived APDS, an appraisal-eligibility decisioning automation service on the Sapiens rules engine with state-aware dynamic logic and human-in-the-loop routing for borderline cases. Authored the PRDs, stories, and API/ETL specifications engineering built against, and hand-tested every stage through UAT and Blue/Green release gates. Delivered 10% better accuracy, 30% less manual review, and $2M+ in annual savings.
- Designed the APDS production controls and carried them through risk, compliance, legal, and audit sign-off: availability requirements, no-run conditions with human fallback, auditability, and fair-lending disparate-impact review.
- Owned the technical response to regulatory action plans as a standing duty: proposed solutions, estimated cost and timeline, built milestone timetables reported to regulators, and set mitigation controls.
- Reset the intake portfolio: built a weighted impact/cost/effort scoring model, later run in Jira, that triaged an approximately 8,000-item backlog to 2,400 viable items and a prioritized top 380, and took fully costed architecture and build-versus-buy options to executives for decision.
- Ran the Jira backlog directly with ICE and Cotality engineering to deliver the Encompass Partner Connect (EPC) gateway on ICE's cloud-hosted Encompass platform, a first implementation that replaced Chase's SDK-based custom integration and became the first-mortgage standard.
- Hands-on product owner for Appraisal across up to six international Agile delivery teams, later consolidated to three, while leading direct-report product owners for Title, Condo, and major initiatives.
- Led Agile delivery of the Home Equity platform replacement, contract to pilot in 9 months versus an 18+ month norm; scaled the global product and engineering team from 40 to 65+, expanding delivery capacity 25%.

loanDepot — Director, Product Management | 2016–2017

- Owned prioritization, requirements, development oversight, testing, and delivery for the cloud-deployed mello consumer, loan-officer, and white-label wholesale-broker portals, integrated with the Lightning online application, Salesforce CRM, and point of sale.
- Led the Docutech document-vendor integration, enabling 2M+ e-signings; drove LOS improvements that doubled distributed-channel volume through the TRID conversion with no pipeline gap.

loanDepot (imortgage division) — Director, Product Management | 2014–2016

- Owned product scope and led development for the 120-branch Empower LOS conversion, including the wholesale broker channel and approximately 270 loan products, in nine months against an 18+ month norm as annual originations grew from $13.2B to $37.9B.
- Designed system-of-record boarding across pipeline, secondary-market activity, servicing, and general-ledger reconciliation, achieving 100% continuity through cutover.

Consulting Experience

The North Highland Company — Senior Manager, Digital Product Delivery | 2012–2014

- **loanDepot / imortgage:** Ran IT program management for the legal merge event and staged the 120-branch Empower conversion, leading to a direct hire to complete it.
- **Walt Disney Parks & Resorts:** Led product delivery for the Disney Parks online ticketing portal, shipping consumer-facing feature releases in true Agile to 10M+ visitors.

SMCI (Software Management Consultants, Inc.) — Senior Consulting Manager | 2011–2012

- **Bank of America Home Loans & Insurance Services:** Designed the data methods and algorithms that identified affected loans for an FHA/HAMP In-Line QA remediation, then executed the analysis and remediation hands-on.

Norman Technologies (Norman Group) — Consultant / Senior Project Manager | 2009–2011

- **Wells Fargo / Wachovia treasury integration ($8.8B merger):** Owned platform requirements for multi-release cash-vault data bridging, EDI, and data conversion through general-ledger reconciliation, writing attribute-level specifications for the vault integration. Directed 78 cash-vault consolidation events, reducing redundancy by 25%+.

Troy Consulting, LLC — Senior Consultant | 2008–2009

- **Microsoft:** Rewrote the Microsoft Solutions Framework into the Solutions Delivery Methodology and co-developed the Services Estimation Tool, both adopted as Services Delivery Worldwide standards; unified 1,800 legal contracts into 180, cutting revision turnaround from months to two weeks.

Earlier Career | 1996–2008

- **Washington Mutual — Consumer Group Program Manager (2002–2005), then Vice President, Enterprise Risk Management (2005–2008):** Owned the $18M Enterprise Decision Engine, the bank's first centralized credit-decisioning platform (rules engine, ETL, database, web transport), processing $205.1B in annual originations. Led the $3.4M Common Analytics Platform on Oracle.
- **IndyMac Bank and Aames Home Loan (1996–2002):** Built and ran a production ETL platform delivering document data to an external vendor, owning the mapping logic, triggers, and annual MISMO remapping. Did hands-on ETL and data mapping across nine automated-underwriting integrations and led Wave 1 of a Six Sigma rollout tied to $6.8M in FY2002 savings.

EDUCATION & CERTIFICATIONS

Bachelor of Arts, Liberal Arts and Sciences — University of Kansas · Six Sigma Black Belt — Six Sigma Academy · Professional Scrum Product Owner I — Scrum.org
